Education

Knox College Galesburg, IL
Bachelor of Arts in Data Science | GPA 3.94 *Expected June 2027*

Technical Skills

Data Analysis: SQL, Python (pandas, NumPy), Excel (pivot tables, formulas), Node.js
Visualization & BI: PowerBI, Tableau
Statistics: Correlation Analysis, Feature Engineering, Data Validation & Cleaning
Tools: Jupyter, Google Colab, Google Sheets, Google Apps Script, OCR, MailerLite API, Java

Experience

Data Analyst Intern June 2026 – October 2026
National STEM Honor Society *Remote*

- Engineered a bot-detection and data-correction pipeline in Python (pandas) and Node.js using the MailerLite API, restoring the integrity of 800,000+ recipient-activity records across 190 email campaigns and identifying 864 bot/scanner accounts and a link-counting bug that had overstated content volume 2x.
- Determined the statistical drivers of email engagement across 127 campaigns by engineering 17 features from subject and body content, isolating a single subject-line pattern as the strongest predictor of open rate ($r = -0.60$).
- Created interactive Tableau dashboards across 185 campaigns, fed by a reusable Jupyter/Google Colab notebook that automated the SQL and Python analysis and exported clean datasets for stakeholder reporting.

Data Analyst September 2024 – June 2026
Center for Teaching and Learning (Knox College) *Galesburg, IL*

- Identified peak demand periods and recurring engagement trends by analyzing 3 years of tutor utilization data across 10,000+ records using Excel pivot tables and structured formulas, informing term scheduling decisions.
- Presented reports on tutor participation metrics and time-based trends to administrative leadership, directly informing a staffing restructure that reallocated resources from 1-on-1 appointments to drop-in service hours.
- Validated and cleaned operational dataset entries before delivery to administrative supervisors, achieving zero reporting errors across 4 term reports.

Computer Science & Mathematics Teaching Assistant January 2025 – Present
Knox College *Galesburg, IL*

- Guided 100+ students across lab sessions and weekly office hours in Java and Python, resolving assignment blockers and debugging errors to reinforce core programming concepts.

Projects

Healthcare Access & Patient Journey Analysis | *Python (NumPy, pandas), PowerBI*

- Examined 8.1M+ patient encounters from Stormont Vail Health across 7 linked datasets using Python (NumPy, pandas) to identify pediatric care access gaps, engineering geographic distribution analysis by joining US Census FIPS codes to patient records to inform capacity planning recommendations.
- Developed an interactive PowerBI dashboard visualizing pediatric patient density across Kansas census blocks, year-over-year growth trends, and transportation barrier impact, presented to a panel of judges.
- Synthesized findings into 3 actionable recommendations for SVH leadership targeting address collection gaps, corridor city capacity expansion, and transportation screening at intake, contributing to an Honorable Mention award among competing teams.

Honor System Statistical Report | *Google Apps Script, Google Sheets, OCR, Excel*

- Designed a centralized database that digitized and standardized multi-year Honor Code case records, replacing fragmented documentation with a searchable dataset for longitudinal analysis.
- Extracted and cleaned historical case records using OCR and Google Apps Script, reducing manual record processing and improving data consistency across semesters.
- Initiated the Honor Board's first annual statistical report, synthesizing 51 cases across 15 departments by class year, violation type, and sanction to support evidence-informed policy discussions.

Campus Involvements

Vietnamese Club Treasurer and Public Relations, Honor Board Co-Chair, Tea House Manager, Knox Ultimate Frisbee, Badminton Club
